Thanks for your interest in Big Medium! Big Medium is a web-based content-management system that allows you to update your site instantly from anywhere in the world. And it's easy: anyone with basic word-processing skills and a web browser can add or edit content without touching any HTML. Writers and editors simply cut and paste articles and other content into a form in their browsers, adding images or pullquotes with the click of a button.

No more broken links or HTML typos. Big Medium manages all of the links on your site, updating your homepage and section page every time you change the content. And because Big Medium also manages all of the HTML/XHTML formatting of your pages, you don't have to worry about making any careless mistakes in the code. All of your pages are squeaky clean and completely compliant with web standards.

This demo site gives you a chance to play in the Big Medium sandbox. The demo site comes pre-populated with sample content that also doubles as a product tour. Read the articles here to get familiar with
