

Scott Myers-Lipton, “Students for DMH and the Fight for Air Conditioning”

Historical Background:

On the campus of San José State sits Dudley Moorhead Hall (DMH), a building that hosts four departments, many faculty offices and classrooms, and serves over 3,000 students a day. DMH was constructed in 1957, but without air conditioning. With its west-facing side exposed to direct sunlight, temperatures in DMH on some April through October days reached 90 degrees and above. For the past 50 years, stories had been told about the intolerable conditions of DMH, but little was done to fix the problem. For at least 20 years, the University told students and faculty that there was no need for air conditioning in DMH because the university was going to knock it down and replace it. Somehow, there was never enough money in the budget to build a replacement building.

The Events:

Things came to a head when several students fainted in DMH on hot days, while others students missed class due to the heat. The Chair of the Psychology Department wrote a letter to the University complaining about the conditions in DMH, which was followed up by a formal complaint lodged by the California Faculty Association. Then, Amanda Adalma, class of ‘14, decided that she had enough, and she started to organize students in the fall of 2013 under the name Students for DMH.

Over the next two and one-half years, the students held rallies, met with administrators, conducted student questionnaires, handed out hand-held fans with Students for DMH on them, passed out water and popsicles in front of DMH, did a cost estimate to install air conditioning, and all with the goal of getting the University to agree to their demand of air conditioning in DMH. When Students for DMH spoke to other students, their opening line was “Are you hot in DMH?” As part of their research, the students learned that schools with a large population of working-class students of color were twice as

likely to be in buildings constructed in the 1950s, and that many of them were without air conditioning. This information provided the students with the frame that they were being treated unfairly due to their social class and race and ethnicity.¹

On April 16, 2014, Students for DMH held a “faint-in”, which was a theatrical event, calling on students to faint in the hallways of DMH to draw attention to the unbearable conditions in the building. That afternoon, as students were leaving their classrooms, and with TV cameras rolling, about 100 students fainted in the hallways. After ten minutes of laying on the ground, the students got up and walked through the building chanting “We Need Change, It’s Too Hot”. After chanting, the students marched to the university president’s office, where they attempted to meet with President Mohammad Qayoumi. The “faint-in” made it on local television stations and on the front page of the campus paper.²

After continual pressure by the students through the spring and fall semester of 2015, President Susan Martin decided to approve a \$3 million air conditioning plan for DMH. The students celebrated with a news conference, which again received local media attention. After the end of the spring semester in 2016, DMH was shut down for installation of the air conditioning, and at the beginning of the spring 2017 semester, DMH was re-opened with air conditioning in every office and classroom.³

**DUDLEY MOORHEAD
HALL FAINT-IN**

Join Students for DMH in the effort to create change on campus.

Participate in the FIRST EVER Dudley Moorhead Hall Faint-in.

Help us in sending the message that DMH needs to be changed!
